

SUPPORT FOR USING THE MILITARY TO FIGHT DRUG CARTELS

 McLaughlin & Associates

# KEY TAKEAWAYS

- More than two in three registered voters support designating drug cartels as terrorist organizations – even if that means military action in Mexico and Central America.
- This support is strong even though the question made a comparison to fighting al Qaeda in Afghanistan.
- The action has majority support from all measured demographics.
- Republicans, men, and older voters are more likely to “strongly support” designating the cartels as terrorist organizations than other groups of voters.

# 2 IN 3 VOTERS SUPPORT DESIGNATING DRUG CARTELS AS TERRORIST ORGANIZATIONS

In 2022, the United States set another record in deaths from drug overdoses – largely driven by an increase in deaths from fentanyl. Given the record number of Americans dying from fentanyl and other drug overdoses, would you support or oppose designating drug cartels as terrorist organizations - even if that means using the U.S. military in Mexico and Central America, just as we did to fight al Qaeda in Afghanistan?

# 3 IN 4 NEW MAJORITY VOTERS SUPPORT DESIGNATING DRUG CARTELS AS TERRORISTS

In 2022, the United States set another record in deaths from drug overdoses – largely driven by an increase in deaths from fentanyl. Given the record number of Americans dying from fentanyl and other drug overdoses, would you support or oppose designating drug cartels as terrorist organizations - even if that means using the U.S. military in Mexico and Central America, just as we did to fight al Qaeda in Afghanistan?

# Methodology

Mclaughlin & Associates partnered with Gingrich360 to conduct a national survey for America's New Majority Project. This national survey was conducted among 2,000 registered voters between September 7-10, 2023.

All interviews were conducted online. Survey invitations were distributed randomly within predetermined geographic units. These units were structured to correlate with actual general election turnout.

The sample of 2,000 registered voters has an accuracy of +/- 2.2% at a 95% confidence interval. The numbers in this presentation have been rounded and may not equal 100%.

New England	5%
Middle Atlantic	13%
East North Central	16%
West North Central	6%
South Atlantic	21%
