Methodology

Mclaughlin & Associates partnered with Gingrich360 to conduct a national survey for America's New Majority Project. This national survey was conducted among 2,000 registered voters between April 16-19, 2025.

All interviews were conducted online. Survey invitations were distributed randomly within predetermined geographic units. These units were structured to correlate with actual general election turnout.

The sample of 2,000 registered voters has an accuracy of +/- 2.2% at a 95% confidence interval. The numbers in this presentation have been rounded and may not equal 100%.
